KEY INSIGHTS

REVENUE GROWTH

Sales increased by 87%
Sales grew from $2.3M in 2011 to $4.3M in 2014. Profit also increased, but annual profit margins must be assessed to determine whether profitability kept pace with revenue growth.

PROFITABILITY GAP

Furniture generates lower returns
Furniture generated $4.1M in sales at an approximate 7.3% profit margin, compared with 14.9% for Technology. This difference warrants further investigation into discounting, shipping costs and product mix.

CUSTOMER REVENUE MIX

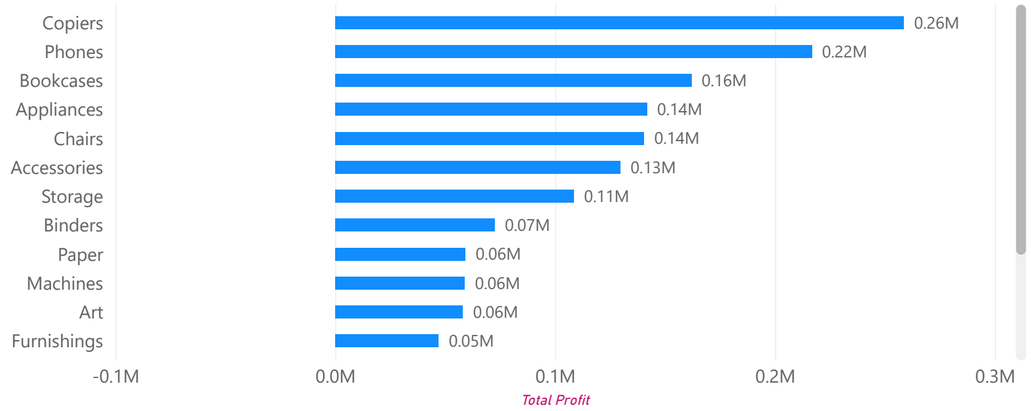

Consumer drives approximately 52% of sales
Consumer generated $6.51M in sales, making it the largest customer segment. Home Office generated $2.31M and had the highest approximate profit margin among the three segments, at 12.1%.

Regional Sales & Profit Performance

Compare revenue and profit contribution across regions.

Customer Segment Sales & Profit Performance

Compare revenue and profit contribution across customer groups.

The Central region generates approximately $2.82 million in sales, compared with $1.60 million in the South. This indicates an uneven distribution of revenue across regions.

High sales volumes do not necessarily indicate strong financial performance. Differences in regional profit contributions may reveal opportunities to improve commercial returns.

The Consumer segment generates approximately $6.51 million, representing 51.5% of total sales. Corporate contributes $3.82 million (30.2%), while Home Office contributes $2.31 million (18.3%).

Revenue contribution alone does not establish which customer segment delivers the strongest financial return. Differences in profit margins can change the relative attractiveness of customer groups.
